## Water-Based Armor-All Type Dressings

KNOCKOUT SPECIAL: *A protectant dressing that imparts a natural shine. It's great for tires, rubber, and vinyl panels & doors. It protects, beautifies and attracts little dust. For best results: apply by spray or with sponge; leave the product surface wet and allow it to dry naturally. It contains a pleasant cherry-strawberry scent.*

SHINE & SHIELD REGULAR: *It is a cream-based dressing and protectant that is silicone-based. Use it for tires, vinyl, rubber, and door panels. Protects, beautifies and is easy to use. It contains a pleasant lemon scent! Apply by hand or spray.*

SHINE & SHIELD CONCENTRATE: *This formulation is a concentrated, white cherry-scented protectant. It is a high gloss universal dressing -- used for tires, vinyl, rubber, dashboards and doors. As it is a very thick product, for best results dilute with water by 30%. It is also designed for wipe on application.*

HIGH GLOSS (ALTO BRILLO): *This formulation is a universal protectant dressing for interior and exterior use. It is thin by design for spray on use. It's great for tires, rubber & vinyl surfaces, panels and doors. It contains a special blend and high amount of protective and emollient ingredients designed to create a superior shine. For best results: spray liquid on the surface and allow the product to dry naturally.*

## **Teflon-Based Armor-All Type Dressings**

**UNIVERSAL SPECIAL:** *It is a universal sealant dressing fortified with Teflon and silicone to give maximum protection. It's pink-colored & bubblegum-scented. This formulation contains the highest quality silicones and emollients that maximize protection and shine. Used for tires, vinyl, rubber, dashboards, leather and doors. For best results: spray the surface with a thin layer. It is designed to revitalize rubber bumpers, moldings and side mirrors. This product produces a long lasting & waterproof shine.*

**BANANA SPECIAL:** *This formulation is a yellow-colored & banana-scented, concentrated protectant. It contains different types of the highest quality silicones, emollients and Teflon for a smooth application and long-lasting shine. It can be applied by hand or diluted with water to 50% for use with a spray bottle. Our product has outstanding surface penetration. It revitalizes and protects rubber bumpers, moldings, side mirrors and fine wood surfaces.*

**BUBBLE GUM SPECIAL:** *It is a universal interior & exterior protectant dressing. This multi-use product is recommended for tires, vinyl, and rubber surfaces. It is made with Teflon, and contains a special blend of high quality protective and emollient ingredients. This product creates a brilliant shine and is water repellent with a pleasant bubble gum scent. Apply with sprayer and sponge. For best results: spray on the surface and allow liquid to dry naturally. It does not attract dust and it dries completely.*

**SHINE TEFLON SPECIAL:** *This formulation is made with Teflon, silicone, glycerine, water and is a protective sealant dressing. It is a good performer with a brilliant shine. This liquid is greaseless and also dust resistant. It can be used in interiors and exteriors – on convertible tops, tires, vinyl, plastics and rubber bumpers. It has a unique and pleasant Teflon aroma. For best results, shake well before each use.*

## Solvent-Based Armor-All Type Dressings

GLOSSY CLEAR: This formulation is a clear protectant dressing made with oil and solvents. This product is transparent, colorless, quick-drying and has a pleasant orange scent. It's primary application is for the protection of hoses and belts in the engine compartment, as well as in the interior vents. It can also be used on new tires, fenders, and plastic & vinyl trim. For best results: we recommend applying by spray and sponge and allowing it to dry naturally. This high quality product does not stain or scratch the surface.

SUPER BLUE DRESSING: This formulation is a blue-colored protectant dressing with a pleasant citrus scent. Made with oil and solvents, it has a brilliant sheen when applied on a black surface. It provides a natural glow when used on very hard surfaces like plastics, vinyl bumpers, trim and tires in new or in good condition. It is an outstanding performer. For best results: use a spray and sponge, and let the product dry naturally. It dries quickly and leaves no marks or scratches on the surface. It is used to rejuvenate trims and frames of sun-damaged vehicles, beautifies nonporous surfaces and is water resistant.

## Gel Tire Dressing

RUBBER DRESSING: This formulation is a light green-colored water-based conditioning protectant. For use on rubber tires and trim, it is high quality and very thick. For best results, dilute with water. This product results in a liquid black appearance. It is dust resistant and does not contain silicone. It is not recommended for interior use or on plastic and vinyl surfaces.

## **Shampoos for Vehicles**

**WASH & WAX:** *It is a thick red solution with a pleasant cherry scent. It is highly concentrated, produces a stable, dense foam and washes/waxes simultaneously. It is a product that resists water marks -- leaving a freshly waxed appearance that provides extra protection and is water repellent. Since a small amount is used, one container yields many washes/waxes.*

**PINK CAR SHAMPOO:** *It is a pink viscous liquid with a pleasant lemon scent. It is a highly concentrated product that produces a long-lasting foam. It is designed for use on trucks, trailers, RVs, motorcycles and boats. It is an extremely efficient cleaner that will not harm the paint and rinses off easily without leaving water spots. It is for the customer who wants to use a universal shampoo to wash cars, carpets and upholstery.*

## **Shampoo for Carpets & Upholstery**

**ALL PURPOSE SHAMPOO:** *It is a thick yellow liquid shampoo with a pleasant bubblegum scent. It is specifically designed for cleaning upholstery and carpets. It produces a luxurious foam which lifts away the dirt and leaves a whistle-clean surface. It is a special blend of quality detergents that allows the user to dry clean upholstery, speed up cleaning and also reduce drying time. It also contains optimal fabric brighteners. For best results, pour an ounce of All Purpose Shampoo into a clean pail. Then add agitated water (spray) from the hose until the foam rises to the top. Use the foamy liquid and scrub the affected area with a brush. Then, lift the dirt up with a clean towel.*

## Specialty Shampoos

LIQUID LAUNDRY: *It is a medium viscous aqua marine liquid designed for all clothing types and colors – including whites. It does not discolor fabrics or irritate the skin. This superior product includes fortified cleaners, softeners, brighteners and fabric disinfectants. The shampoo lifts dirt and grease from clothes and leaves them soft and clean with a fresh cherry lemon scent. This shampoo eliminates the need for a fabric softener.*

DISH SHAMPOO: *It is a citrus scented concentrated liquid soap that produces rich suds. It cuts through grease and fat to leave your dishes sparkling clean with no water spots. Because it also contains conditioners, it is also kind to your hands. The shampoo is vitamin A and E enriched.*

LIQUID SHAMPOO FOR HANDS: *It is a thick, cherry and strawberry scented liquid shampoo that works up a rich lather to thoroughly clean your hands. It contains conditioners that are good for your skin! It does not dry out the hands or leave a greasy residue. It is also multiple vitamin and lanolin enriched.*

BODY SHAMPOO: *Our sea breeze scented body wash produces a rich lather that thoroughly cleans the pores and rinses without leaving a film. Its emollients and lotions leave your skin smooth and soft.*

MEAN GREEN: *is a pH neutral multi-use interior cleaner. It produces high foam to easily lift and suspend dirt and grime. It is designed to clean all types of painted surfaces plus plastic, vinyl, leather, carpet and upholstery. For best results, dilute Mean Green one to one with water.*

## Degreasers

CLEANS-ALL: *A non-caustic versatile degreaser, It is designed for in the interior and exterior of a vehicle. It is also used for washing carpets, upholstery, landau roofs and wheels. It is an excellent product for removing upholstery and carpet stains.*

WHITE WALL CLEANER: *It is designed for the cleaning of grease stains, road grime and brake dust, on wheels, wheelwells and tires. It acts quickly and specifically targets the worst buildup while dissolving grease and grime with ease. It is medium foaming and contains ingredients that allow for easy rinsing. Other uses include cleaning lightly soiled carpets as well as cleaning rubber surfaces.*

HOME RUN DEGREASER: *This product is formulated for heavy duty degreasing. It is a highly effective cleaner for interiors. It can also be used on automobile engines that are not too soiled. It is safe to use on aluminum engines. It cleans wheels, tires, rugs, carpets and tapestries. It is a medium to low caustic cleaner that will not stain surfaces.*

PURPLE STUFF DEGREASER: *This is a highly alkaline and caustic formulation. It creates a high foam that is very effective for cleaning soiled engines and chassis. It is designed to clean the most difficult jobs and is a fast-acting emulsifier that thoroughly cleans concrete floors and ferrous surfaces. Not recommended for use in aluminum engines or other aluminum surfaces.*

PRO GREEN DEGREASER: *Since this formulation is pH neutral, it can be safely used on all painted surfaces as well as aluminum and chrome. While it is non-caustic, it is still aggressive. Its low foam action works well on sensitive areas like indoor carpets, upholstery and door frames. It is designed for use in the combined cleaning and dirt extractor machines that use "ALL PURPOSE SHAMPOO". This formulation will not stain.*

PRO RED DEGREASER: *This is a professional strength cleaner. The abundant and rich foam lifts and removes dirt and oil and rinses clean. It is a fast acting, medium caustic cleaner that works well on most surfaces as well as chrome. For aluminum and clear coat surfaces, dilute the product and use with caution.*

WAX STRIPPER: *It is a fast acting & professional strength degreaser. Designed for cleaning car engines, extremely dirty aluminum engines; plastic, rubber, hoses and other engine parts with only cold water. Removes wax buildup on floors and other surfaces. It helps to revive the colors of these surfaces, it will not stain or scratch.*

## Degreasers

PRO BLUE DEGREASER: *This professional formulation is highly alkaline and caustic. It is designed for cleaning ferrous car engines, chassis and concrete floors. Additionally, it cleans metal or ferrous parts by quickly dissolving dirt and grime buildup. The formulation is an excellent wax remover for floors and is designed for the hardest and dirtiest applications. Do not use aluminum engines and surfaces because it will stain. Shake well before each use.*

BLACK DIAMOND SUPER DEGREASER: *This professional formulation is designed for cleaning the grimeiest aluminum car engines and parts. It is super safe and quickly dissolves heavy grease, grime and deep stains. While it is a professional strength, it does not contain acids or solvents.*

MARQUE DEGREASER: *This professional grade formulation is made from degreaser, citrus and acids. It produces an extremely high foam that removes even the most stubborn stains. It removes dirt and grease without rubbing or scrubbing. This cleaner is a great product for concrete floors, aluminum surfaces and stainless steel. This product contains brighteners for concrete. Please shake well before each use.*

UNIVERSAL CLEANER: *It is a very foamy medium thick pH neutral cleaner. It can be used for cleaning vinyl, plastic, leather, painted surfaces, carpets, chrome and aluminum without staining. This unique formulation is shampoo-degreaser based that clings well to verticle surfaces.*

CLEAN& BRIGHT: *It is combination cleaner that is used to clean whitewall tires. And it is used as a despotter, and stain remover for white clothes. It is never to be used on colored clothes. It contains whiteners, brighteners, and also a disinfectant. With our product you never need to use chlorine. It leaves clothes clean and bright without using chlorine. Other uses include cleaning bathrooms, removing fungi, mold and hard to remove old shower soap.*

XTREME TIRE AND WHEEL CLEANER: *It is a pH neutral tire and wheel cleaner. It is a super safe cleaner for all types of wheels. It will not stain or damage polished aluminum, clearcoat, aluminum, chrome, magnesium, or painted wheels. It is a light viscous product that clings well to verticle surfaces which enhances rapid and thorough cleaning.*

## Acid-Based Cleaners

HEAVY DUTY FALLOUT REMOVER: *This solution was formulated to remove environmental fallout -- such as industrial pollution, environmental dust, cement dust and dust from steel railroad tracks. This product works fast and should be used with caution on automotive finishes. It is easy to apply. Just rinse the car with water and then wash it with Heavy Duty Fallout Remover. Then rinse and dry the vehicle.*

ALUMINUM BRIGHTENER: *This acid-based formulation produces a lot of foam -- facilitating quick cleaning of wheel surface contaminants. It rapidly cleans aluminum & polished aluminum rims, wire (spoke) wheels, magnesium and chrome parts.*

HEAVY DUTY RUST REMOVER: *This formulation removes rust on all metal surfaces. It is for home, vehicle and industrial applications. It is a professional strength remover that cleans rust and oil on metal surfaces and laminates, as well as honeycomb radiators. It is manufactured from three acid types and surfactants. It generates a high foam and works quickly. It also removes ferrous and non-ferrous oxides and can be used on stainless steel. Prior to use, rinse with water the area to be cleaned. Then spray the product over the wet surface. Clean with brush, then rinse and dry.*

WATER SPOT REMOVER: *This formulation is a soap buildup and water spot remover. It is made from a mixture of acids and surfactants -- but is not caustic. It is great for removing stubborn water stains. Our product produces a rich foam that quickly lifts contaminants from surfaces. It is also excellent for removing water stains from fine glass, automobile glass or windshields. Do not use on painted surfaces because it will stain.*

LIME DEPOSIT REMOVER: *This specially formulated cleaner to remove plaque in bathrooms. It is a heavy duty cleaner that is designed to work very quickly. It removes all types of stains and mildew in bathrooms -- including toilets, showers and leaves the faucets and other fixtures nice and bright. It does not irritate the nose and it is non-toxic -- with a pleasant orange scent.*

## **Polishes with Waxes**

(For application by hand or with a buffer.)

**RECON:** *This product is formulated for hand waxing on conventional car finishes. It polishes and waxes at the same time. It removes light and medium oxidation and then cleans, polishes and protects. Containing UV blockers it also consists of various silicones, emollients and color brighteners. It is very effective on silver, gray and metallic paints. Recon also restores the finish to its original condition.*

**CRYSTAL GLAZE:** *This is formulated as an ultra fine hand applied polishwax for use in the sun or shade. For light work on clear coat paints, (CLEAR-COATS). It can also be used to erase sponge buffered streaks. Works great for removing scratches, scratches with light oxidation while it polishes and protects without staining, or leaving buffer marks or dust. It gives a bright sheen and leaves a dust repellent surface. Does not stain black, green, blue or red paint finishes. With a pleasant coconut scent, it contains emulsions to make it easier to remove in the sun.*

**POWER BRIGHT:** *It is formulated as smooth, very thin and light one step hand applied wax. It is designed to remove scratches as thin as a hair and imperfections in clear coatings. It contains a mixture of high quality wax, silicones and mineral oils to provide more protection and shine. Our product will not scratch or stain black, red or green paint finishes. It repairs and softens original paint and freshly-painted finishes. Gets good results using a sponge or wool to eliminate streaks.*

## **Streak Removal**

**HEAVY DUTY CLEARCOT COMPOUND (HDCCC):** *It is formulated as a compound for use with a polishing buffer with wool or sponge. Designed to be used to remove scratches caused by wet sandpaper #1500 and #2000. The HDCCC will not stain the paint and will prepare the surface for one of our great waxes. It is recommended for use on light and dark paint finishes. While it removes light oxidation and scratches, it restores the original paint finish. This product contains wax and is silicone-free.*

## **Polishes & Compounds**

(For application with a buffer.)

**EMERALD CUT SUPER POLISH #8:** *It is formulated as a super fine compound for use with a high speed buffer. It does not contain any wax or silicone. The product does not allow dust or lint to stick to the surface. It is designed for use with foam pads to remove light scratches and streaks. Removes light oxidation, imperfections in the paint and streaks made by wet sandpaper #2000 super fine and very fine. A true microfine polish.*

**WHITE DIAMOND POLISH AND GLAZE #9:** *It is formulated as a very fine compound to be used with a high quality buffer. This product is a smoother, cleaner and protector that removes fine scratches and oxidation. It can be used to remove the scratches produced by wet sandpaper #1500 or finer over conventional paints or clear coat finishes. It leaves a high gloss that is long-lasting. The #9 formulation contains paraffin wax, carnauba wax, silicone and seal emulsifiers.*

**FOAM PAD GLAZE # 11:** *This formulation is a very thin and lightweight polishing compound. It is designed to remove very thin scratches produced by wet sand paper micro-fine #2000 or finer. This product repairs paint imperfections on clear coatings. It is designed for use with a high speed buffer. It can be used to remove swirls left by a wool pad. For best results, use in a dry heat to allow you more polishing time, This product contains mineral oils and emulsifying carnauba wax. It contains no silicone.*

**RUBY CUT LITE COMPOUND # 12:** *This formulation is used to remove wet sanding scratches produced by micro-fine #1000. It helps remove swirl marks and blemishes in the paint finish. This product is extremely effective for restoring clear coats, conventional paints, silver and oxidized metallic paints. The formula contains medium to fine abrasives to clean the paint. It can be used to remove sponge or wool swirls with good results. It contains no wax or silicone.*

**MEGA CUT # 13:** *This formulation is used to remove sanding scratches produced by micro-fine wet #1000-#1500. It is extremely effective in restoring clear coats. It is to be used with a high speed buffer and wool or foam pad. This product removes irregularities in paints, and removes swirl marks and blemishes in the finish. Buffer is recommended with wool on conventional paint, metallic paint, silver paint and rust. It is acrylic-based.*

## **Polishes & Compounds**

For application with a buffer.

RUBY CUT UTRA SUPER COMPOUND #14: *This thick professional formula liquid rubbing compound is very aggressive. It is designed for use with a high speed buffer or by hand. Contains no waxes or silicones, is non-sticky and will not attract dirt, lint and recent dust. It will remove oxidation and deep scratches – similar to a very aggressive wet sandpaper. This product removes defects in paint and swirls produced by wet paper micro-fine #800 to #1200. It is excellent for use with conventional paint finishes. The #14 contains lubricants and brighteners, and is super safe for use on traditional paint finishes.*

RUBY CUT SUPER HEAVY COMPOUND #15: *Our formulation is a very thick and aggressive liquid rubbing compound. It is for use with a buffer or by hand and contains no waxes or silicones. It is resistant to dirt and lint during the treatment. Designed to remove deep oxidation and deep scratches, It works like an aggressive wet sandpaper. It also removes paint defects such as orange peel, mist coat and paint swirls produced by micro-fine sandpaper #600 to #800.*
